

Oven Cleaner

**DESIGNED TO QUICKLY PENETRATE AND LIQUIFY
BAKED-ON FOOD, GREASE, AND CARBON DEPOSITS...**

HIGH FOAMING FORMULA... A high foaming formula designed to quickly penetrate and liquify baked on food, grease and carbon deposits from most commercial and industrial ovens and grills.

USDA AUTHORIZED... This non-flammable and completely phosphate free formula is USDA Authorized for use as a degreaser/cleaner in removing baked on carbon deposits, grease, and foods from cooking and smoking equipment, food utensils and other like surfaces in Federally inspected meat, poultry, rabbit, and egg processing plants.

VERSATILE APPLICATIONS... Product is designed to work well on ovens, grills, griddles, charcoal broilers, rotisseries, drip pans, and smaller kitchen cutlery items.

Directions For Use: Commercial Ovens

Wearing rubber gloves and protective eye goggles, apply product (undiluted) to the bottom of the oven, sides, and top evenly. Allow product to stand 10 minutes in warm oven, or 25 minutes in cold oven before gently agitating soil with a synthetic pad or brush. Wipe surface removing major soil and then thoroughly rinse all surfaces with damp cloth or sponge. Stubborn, thoroughly baked on food and carbon deposits may require additional application. Once oven is completely clean, thoroughly rinse and then heat oven to 220° for 10 minutes before cooking additional foods.

CAUTION: Do not apply to heating elements, electrical switches or connections.

SAFETY DATA: Danger: Contains sodium hydroxide and glycol ether. May cause burns. Harmful if swallowed. Wear safety glasses and resistant gloves. Avoid prolonged or repeated skin contact. Use with adequate ventilation. Avoid prolonged breathing of vapors. This product is alkaline in character.
