Re: Combat XIX, EPA Registration 1839-83

Dear Mr. Garcia,

The Combat XIX (EPA Registration number 1839-83) has an EPA approved master label claim against SARS-CoV-2 (COVID-19) with a one-minute contact time for hard, non-porous surfaces. It is not corrosive and is not flammable as indicated by the master label and SDS. Our SDS system designates extra precautions; however, the product does not require use of a respirator, as indicated by the master label and product label.

Please follow label precautionary statements and label directions when using the product.

Per the terms and conditions of the subregistration agreement, the subregistrant is responsible for complying with all the applicable laws and regulations relating to its sale and marketing of subregistration products.

We thank you for the opportunity to be of service. Please let us know if you have any further questions.

Sincerely,

*Victoria Duwve*
